Setup OpenCSW on Solaris 10 and Solaris 11

Install pkgadd utility

For SPARC systems :

```
pkgadd -d http://opencsw.ma.eurocopter.corp/opencsw/pkgutil-sparc.pkg
```

Or for x86 systems :

```
pkgadd -d http://opencsw.ma.eurocopter.corp/opencsw/pkgutil-i386.pkg
```

Configure the local mirror

Uncomment the file **/etc/opt/csw/pkgutil.conf** accordingly to connect to the local mirror :

```
mirror=http://opencsw.ma.eurocopter.corp/opencsw/stable
```

Update the local package list

```
/opt/csw/bin/pkgutil -U
```

Then enjoy

Now you can install any OpenCSW package. For example, to install **vim** :

```
/opt/csw/bin/pkgutil -a vim  
/opt/csw/bin/pkgutil -y -i vim  
/opt/csw/bin/vim
```
